

10 REASONS

TO CHOOSE 3DEXPERIENCE® CATIA ON THE CLOUD

CATIA, powered by the 3DEXPERIENCE® platform, enables startups and engineering companies to achieve engineering excellence via its powerful array of social and collaborative 3D modelling and simulation tools.

Visit go.3ds.com/cloud to learn more.

1 SUCCEED IN COMPLEX DESIGN

Create high-quality and complex mechanical shapes.

3 POWERFUL COLLABORATION

Collaborate across teams on the same data and the same project in real time.

5 IMPROVE THE QUALITY OF YOUR PRODUCT

Reach the best level of high-end surface quality modeling (for successful product design).

7 SET IN MOTION & VALIDATE YOUR IDEAS

Limit physical prototypes and get design right the first time by simulating complex product behavior in one unified environment.

9 CAPITALIZE, AUTOMATE & REUSE

Boost productivity by reusing existing functions or components to reduce non-value added engineering time.

2 BEST IN CLASS ENGINEERING

Enjoy a smooth engineering process workflow while designing without limits.

4 EASY TO INSTALL, MAINTAIN AND SCALE

Quickly install, add new roles, manage users without any IT constraints and management costs.

6 OPTIMIZE MANUFACTURING PROCESS

Bring virtual definition closer to real-life definition.

8 ACCESS THE RIGHT INFORMATION DIRECTLY IN 3D

Define a part and assembly with tolerances and annotations directly in 3D, making the definition more accurate.

10 PRODUCTIVE USER EXPERIENCE

The platform's lean and intuitive user interface ensures that it will be simple to use – for new or casual users.
